

SuperPump

a Specialized, Affordable RO Booster Pump and Automatic Shut-off System

The Worlds First Integrated Design of Reverse Osmosis Booster Pump

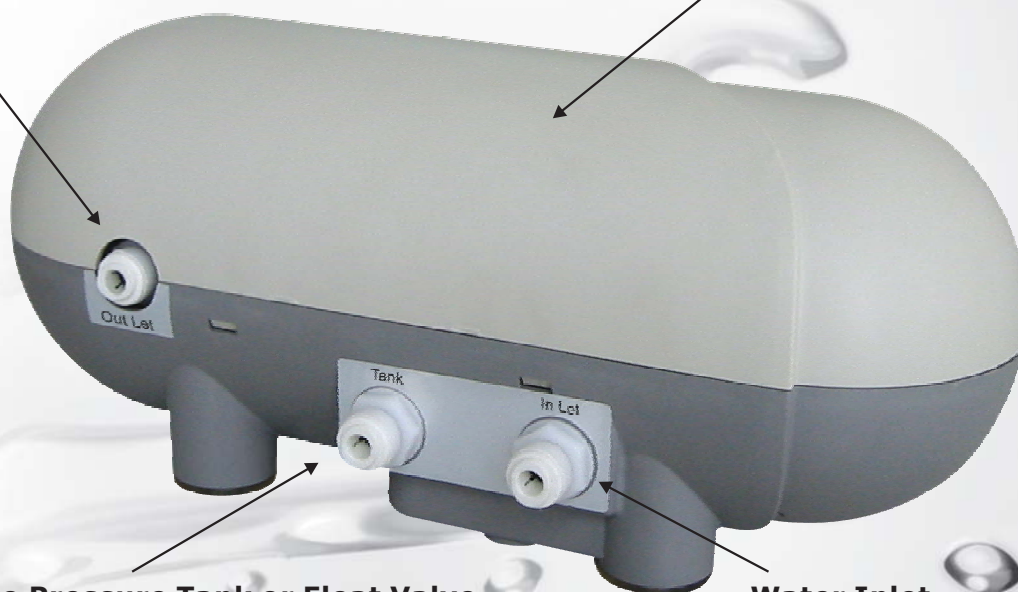

SuperPump is a revolutionary new design. Designed for where feed water has very low water pressure (under 45psi) or where the source water contains higher than normal amounts of dissolved solids. Easily upgrade your RO production from 50 gallons per day to almost 200 gallons per day.

Quick connector allows for quick and simple installation

Water Outlet

Connected to your RO system

Designed for simple installation and operation

Connected to Pressure Tank or Float Valve

Built-in high pressure switch to automatic shut-off when water storage tank is full

Water Inlet

1/4" quick connector
Easy and Convenient

PurePro have developed the integrated pump to make it simpler to install a managed pump system on Reverse Osmosis systems and water filters for application when water pressure is low.

SPECIFICATIONS

- Power source: AC 110V ~ AC 240V
- Dimensions: 28 (L) x 12 (W) x 12 (H) cm
- Unit Weight: 5 kg
